

How do I access Starfish?

Guide created and shared by The Student Academic Hub

Via Canvas:

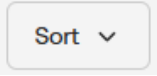

1. Open any of your courses in Canvas.
2. Click on **Starfish** from the left-hand menu of pages.

Tip: If you aren't seeing Starfish listed here, it may be hidden for this course. To make it visible again, click on **Settings** at the bottom of this menu, and then click on **Navigation**. You should be able to re-enable Starfish from this page.

Via the Single Sign-On Portal:

1. Log in to Marymount's Single Sign-On Portal: sso.marymount.edu
2. From the "My Apps" home screen, either search "Starfish" in the search bar or find it in the app tiles that display.

Tip: Click  at the bottom of the page and create a "Favorites" section. Drag your most-used apps into that section, then use  at the top of the page to ensure that these apps always appear first on your home screen.
